

Zebra ZXP Series 8 Card Printer

Manufacturer Zebra Technologies Corporation
<https://www.zebra.com/us/en.html>

Description Zebra's highly advanced ZXP Series 8 retransfer card printer and its patented image transfer process produces durable color plastic cards fast! But best-in-class speed doesn't mean print quality suffers, as ZXP Series 8 achieves superior, photo-like image quality, producing rich, consistent colors with strikingly sharp resolution.

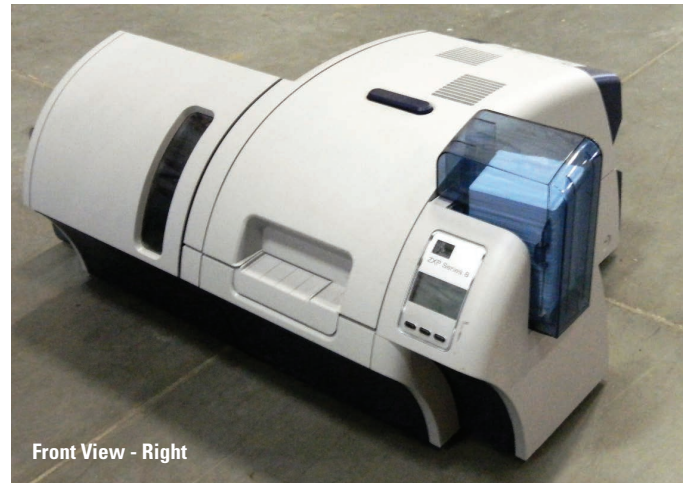

Condition Printer used sporadically over three years. Has original software, accessories and manuals. Runs but needs repair to restore print quality.

FEATURES

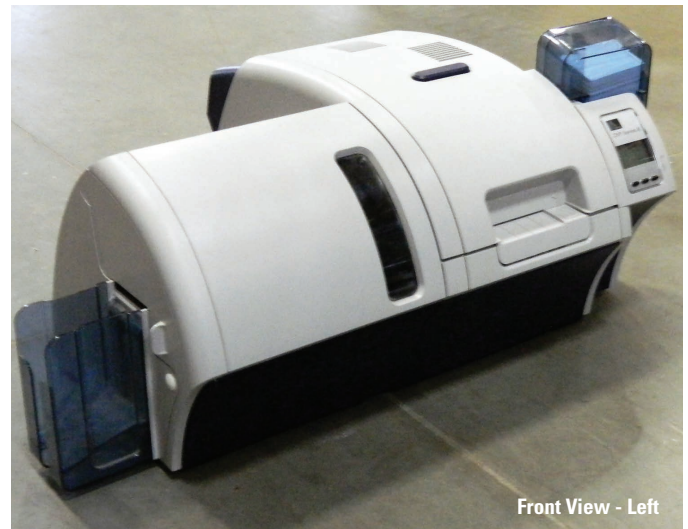

- Patented dual-sided simultaneous transfer process increases throughput and flatness without sacrificing quality.
- Print on uneven card surfaces
- True edge-to-edge printing (via over-the-edge printing).
- Photo-quality color and resolution meet quality and brand specifications
- Prints on non-PVC cards
- USB and Ethernet connectivity interfaces are standard, and WiFi optional for easy integration into local, networked, or wireless systems.
